Game for 2 - 4 players

- The aim of the game is to collect as many boxes as possible and get the highest total score.
- Each player needs a different coloured pen or pencil.
- Take turns to connect two dots together either horizontally or vertically - you can only connect dots that are next to each other.
- When three sides of a square has been connected, the next player can connect the final side and claim the box along with the number inside by shading the box in. If a player claims a box they get an extra go.
- The game ends when all the boxes have been claimed.
- To find the winner, each player adds up the numbers inside their boxes and add that to the total number of boxes they have claimed. The highest score wins.
